Lead Safety 8-Hour Certification Course *EPA Approved*

Presented by: Scott Corbat, Instructor w/Builders License Training Institute

Any renovation work (including painting) done for compensation, which disturbs painted surfaces in residential dwellings or child-occupied facilities built before 1978, must be performed by an EPA certified company, using persons trained in lead-safe work practices (including testing, signage, work set-up and clean-up). Each job site is required to have a Certified Renovator on site to perform specific responsibilities.

To become a Certified Renovator, a person must attend an 8-hour EPA approved training course

**Friday, December 8, 2017
8 am – 5 pm**

**HBA Members - \$185
Non-Members - \$225**
