

# FL Weatherization and Renewable Energy

Course# 0610624

---

## COURSE SYLLABUS

### Course Description

Building homes that are well protected from the weather should be a priority for any building professional. The majority of problems stem from improper procedures and workmanship, but often the problem is found in the design of a home.

Renewable energy is contributing more and more to the world's ever-rising energy demands. Wind and solar energy generation systems are about to reach the level of affordability that will allow them to be considered equal to conventional power generation systems like fossil fuel plants and hydro-electric dams.

This seven hour internet video course will explore factors that contribute to exterior shell failure, and identify practical solutions that will preserve the integrity of the building envelope. Participants will gain an awareness of the benefits of solar and wind energy: for residential and commercial use.

---

### Weatherization I

*\*Learning Objectives:* 1) Understand cause and effect of weatherization problems within the construction industry. 2) Understand contractor

responsibilities, what to avoid and what to embrace. 3) Recognize the cause of most below-grade moisture issues and the remedies that should be taken.

### **Why is There a Problem?**

1. Rationale
2. Primary Warranty and Insurance Claims
3. Solutions
4. Experience
5. Contractor Responsibilities
6. Insurance Availability and Affordability

### **The Building Envelope System**

1. Building Envelope System
2. Performance Objectives
3. Physical Components
4. Sources of Moisture Intrusion
5. Results of Failure

### **Foundation Construction**

1. Thermal and Moisture Protection
2. Groundwater
3. Gutters
4. Crawl spaces
5. Damp proofing and Waterproofing
6. Girders and Beams

### **Assessment**

---

## **Weatherization II**

**\*Learning Objectives:** 1) Recognize the causes of high humidity in homes and how housewraps and flashings work. 2) Describe some of the steps and terminology for installing flashings and code minimums.

3) Know how to prepare window and door openings for proper installation.

## **Wall Construction**

1. Wall Framing
2. Vapor Diffusion Problems
3. Recommendations
4. House Wrap and Underlayment
5. Window and Door Openings
6. Flashing and Caulking
7. Siding

## **Roof Construction**

1. Skylights
2. Moisture Penetration
3. Roof Valleys
4. Shingles and Shakes
5. Roof Sheathing
6. Repairs
7. Flashing

## **Window and Door Installation**

1. Windows, Doors and Skylights
2. Proper Flashing
3. Door and Window Installation

## **Assessment**

---

## **Weatherization III**

**\*Learning Objectives:** 1) Recognize the purpose of ventilation and ventilation requirements. 2) Understand how a capillary break works with other components to prevent moisture intrusion. 3) Be aware of consumer remedies and contractor responsibilities.

## **Ventilation System Installation and Requirements**

1. Code
2. Attic Ventilation
3. Heating, Ventilation and Air Conditioning

## **Building Envelope Best Practices**

1. Moisture Retarding Construction
2. Capillary Breaks
3. House Wrap Installation
4. Window and Door Installation
5. Siding Installation
6. Roofing Best Practices

## **Consumer Remedies**

1. Common Mistakes
2. Preventative Measures
3. Warranties
4. Complaints
5. Arbitration and Dispute Resolution

## **Assessment**

---

## **Wind Power I**

***\*Learning Objectives:*** 1) Be able to describe the history of harnessing the wind's energy. 2) Identify the difference between wind energy and conventional energy production. 3) Appreciate some of the "Pro vs. Con" debates regarding Green Renewable Wind generated energy.

1. History
2. Products and Components
3. Sources of Energy Production
4. Offshore Production: Pros and Cons
5. Onshore Production: Pros and Cons

## Assessment

---

### Wind Power II

**\*Learning Objectives:** 1) Understand what “distributed” wind power really means to home owners, communities and industry. 2) Appreciate some of the solutions addressing concerns over the harvesting of wind energy. 3) Recognize the concerns of the home owner or small business owner when deciding on whether or not to pursue wind energy.

1. Distributed wind power
2. Automation and Safety Factors
3. Grants and Incentives
4. Residential and Small Business Wind Generation

## Assessment

---

### Solar Energy Use I

**\*Learning Objectives:** 1) Understand the difference between “passive” and “active” solar energy use. 2) Know what PV stands for, and how PV solar energy collection varies from traditional solar heat collection. 3) Gain an awareness of the benefits of solar energy: for residential and commercial use as well as how solar energy benefits the environment.

1. Solar Energy: Passive/Active
2. Solar Photo Voltaic
3. Industry Acronyms and Terms
4. Residential and Small Business Solar Use
5. Rebates and Incentives

## Assessment

---

## **Solar Energy Use II**

**\*Learning Objectives:** 1) Understand some small business or home owner advantages. 2) Realize there is a price to pay for clean, green energy. 3) Recognize pros and cons when considering solar.

1. Small Business Systems
2. Residential Use
3. Solar Pros and Cons
4. Structural Considerations
5. Installation and Mounting Considerations

### **Assessment**

---

## **Solar Energy Use III**

**\*Learning Objectives:** 1) Be aware of the history of man harnessing the sun's energy. 2) Know the amount of solar energy versus conventional fuel produced energy in the United States. 3) Learn some new terms and gain an appreciation for what "green energy" really means.

1. Solar Harvesting
2. Solar Power Plants
3. Industry Acronyms and Terms

### **Assessment**

---

Course instructors will be available by email or telephone between 9am and 5pm Eastern Standard Time. They will assist you with questions regarding course content.

If you have any questions, please call us at 1-800-727-7104 or send an email to [info@licensetobuild.com](mailto:info@licensetobuild.com). Email responses will usually be returned promptly, but guaranteed within one business day.

Student policies and procedures are always available by going to [www.licensetobuild.com](http://www.licensetobuild.com) and scrolling to the bottom of the page (See Privacy and Refund Policy).
