Builders License Training Institute

Provider # 50119841

5112 U.S. 31 N

Williamsburg, MI 49690

1-800-727-7104

e-mail: info@licensetobuild.com

Credit(s) earned on completion of this course will be reported to AIA CES for AIA members. Certificates of Completion for both AIA members and non-AIA members are available upon request. This course is registered with AIA CES for continuing professional education. As such, it does not include content that may be deemed or construed to be an approval or endorsement by the AIA or any material of construction or any method or manner of handling, using, distributing, or dealing in any material or product.

Course Description

The ADA is one of America's most comprehensive pieces of civil rights legislation that prohibits discrimination and guarantees that people with disabilities have the same opportunities as everyone else to participate in the mainstream of American life -- to enjoy employment opportunities, to purchase goods and services, and to participate in State and local government programs and services. The 2010 Standards set minimum requirements – both scoping and technical – for newly designed and constructed, or altered State and local government facilities, public accommodations, and commercial facilities to be readily accessible to and usable by individuals with disabilities.

This one hour video course covers the *sixth chapter* of the 2010 ADA Standards for Accessible Design, ***Plumbing Elements and Facilities***. The material for this course is presented by simple narration and power

point video presentation, including on-site, real world video examples in various accessible buildings used by both the public and private sector.

After completing this course participants will be able to:

- Recognize the importance of adequate plumbing elements and facilities for disabled persons.
 - Identify the ADA requirements for drinking fountains, toilet facilities, bathtubs, showers, and applicable hardware.
 - Outline at least one design strategy based on ADA standards for the construction of either a public or private building.
 - Summarize the options available to the design or building professional when designing a facility per the requirements of the ADA Standards.
-

Course Syllabus

Lesson One 601-604.96 (35 minutes)

1. Drinking Fountains
2. Toilet and Bathing Rooms
