

# 2010 ADA Standards: Real World Application

*Course #SRA0079 Syllabus*

---

## Course Description

The ADA is one of America's most comprehensive pieces of civil rights legislation that prohibits discrimination and guarantees that people with disabilities have the same opportunities as everyone else to participate in the mainstream of American life -- to enjoy employment opportunities, to purchase goods and services, and to participate in State and local government programs and services. The 2010 Standards set minimum requirements – both scoping and technical – for newly designed and constructed, or altered State and local government facilities, public accommodations, and commercial facilities to be readily accessible to and usable by individuals with disabilities.

This eight hour video course covers the *second and tenth chapters* of the 2010 ADA Standards for Accessible Design. *Chapter 2: Scoping Requirements* sets the stage for all the following chapters of the ADA Standards. *Chapter 10* outlines the requirements for recreational facilities. In this video course, material is presented by simple narration and power point video presentation, as well as on-site, real world video examples in various accessible buildings, used by both the public and by private businesses.

### *After completing this course participants will be able to:*

- Recognize how the overall philosophy of the Americans with Disabilities Act can, and does create an environment of opportunity and non-discrimination.
  - Be able recognize what facilities can, and should comply with ADA standards.
  - Identify the ADA requirements for amusement parks, fitness equipment, golf facilities, play areas and swimming or boating facilities.
  - Outline at least one design strategy based on ADA standards for the construction of either a public or private building.
  - Summarize the options available to the design or building professional when designing a facility per the requirements of the ADA Standards.
-
