

# Residential Code Review Online

## 3HR CE Course Syllabus

---

### Course Description

This three hour course is a review of the codes required for residential construction. This course focuses on five chapters of the 2009 Michigan Residential Code book that relate to building features and components. Participants will be presented with practice questions and attached references (which will direct them to the correct section of the code book) to find the appropriate response. The practice problems will help participants to quickly navigate the format and content of the code book.

- Format: Text
  - Quizzes: 70% Pass Rate
- 

### COURSE OUTLINE
